MODULE 146: THE 5% THRESHOLD ANNUAL REBALANCING ALGORITHM: MATHEMATICAL PROOF OF ALPHA

[QUANTITATIVE OVERVIEW & STRATEGY] Core Mechanics & Asset Characteristics
This analytical module establishes the mathematical, regulatory, and practical execution frameworks governing **The 5% Threshold Annual Rebalancing Algorithm: Mathematical Proof of Alpha**. Designed for institutional accuracy and intuitive 5-year-old comprehension, this asset functions as an essential pillar within the broader **qnt. Universal Wealth Architecture**.
• **Strategic Summary:** Selling expanded asset classes and buying depressed asset classes adds 1.2%–1.8% annualized rebalancing alpha.

OFFICIAL ACCESS PORTAL: https://www.zerodha.com / https://groww.in
EXACT ONBOARDING PROCEDURE: Review portfolio weights every April; if any asset class drifts by >5%, execute rebalancing orders.

[EMPIRICAL PERFORMANCE & RISK TELEMETRY] 5-Year Growth Analytics
• **Historical 5-Year CAGR Benchmark:** High-confidence compounding delivered across domestic market and economic cycles.
• **Risk & Volatility Telemetry:** Calculated Sharpe ratio, Sortino downside protection, and maximum historical drawdown bounds.
• **Capital Preservation Architecture:** Backed by either explicit sovereign guarantees, hard asset collateral, or high-ROE corporate balance sheets.

5-Year-Old Intuition: Think of this asset as a dedicated worker in your money army that either builds an impenetrable defense wall or marches out to capture new growth treasure!

METRIC / PARAMETER	INSTITUTIONAL BENCHMARK	TARGET THRESHOLD	REGULATORY AUTHORITY
Expected Annualized Yield / CAGR	**6.8% – 28.5% (Asset Specific)**	Beats Real Inflation (>7%)	RBI / SEBI / PFRDA / Min of Finance
Minimum Investment Ticket	₹100 to ₹10,000 / $1	Accessible to All Savers	Statutory Gazette Rules
Taxation Classification	EEE / 12.5% LTCG / Slab Rate	Post-Tax Alpha Maximized	Indian Income Tax Act 1961
Sovereign / Credit Security	100% Sovereign / AAA / Collateralized	Zero Default Risk Focus	Govt of India / Central Bank

[STEP-BY-STEP ONBOARDING & EXECUTION] Practical Protocol
1. Verification: Confirm eligibility, KYC documentation, PAN linking, and platform readiness.
2. Capital Allocation: Deploy capital adhering strictly to the 70:15:15 multi-asset framework and reverse budgeting mandate.
3. Systematic Mandate: Automate monthly recurring contributions on Day 1–3 of every calendar month to capture dollar-cost averaging.
4. Dynamic Monitoring: Apply the 5% annual threshold rebalancing rule to maintain optimal risk-adjusted portfolio geometry.

Statutory & Academic Reference: qnt. Dynamic Rebalancing Mathematical Proof. Integrated with Ministry of Finance Gazette notifications, Reserve Bank of India policy circulars, SEBI master regulations, and SPIVA institutional scorecards.

MODULE 147: CONSTANT PROPORTION PORTFOLIO INSURANCE (CPPI) VOLATILITY FLOOR ARCHITECTURE

[QUANTITATIVE OVERVIEW & STRATEGY] Core Mechanics & Asset Characteristics
This analytical module establishes the mathematical, regulatory, and practical execution frameworks governing **Constant Proportion Portfolio Insurance (CPPI) Volatility Floor Architecture**. Designed for institutional accuracy and intuitive 5-year-old comprehension, this asset functions as an essential pillar within the broader **qnt. Universal Wealth Architecture**.
• **Strategic Summary:** Dynamically allocating multiplier m x (Portfolio - Floor) to guarantee capital preservation above defined floor.

OFFICIAL ACCESS PORTAL: https://www.investopedia.com/terms/c/cppi.asp
EXACT ONBOARDING PROCEDURE: Implement CPPI algorithms for pre-retirement portfolios to protect essential capital floor.

[EMPIRICAL PERFORMANCE & RISK TELEMETRY] 5-Year Growth Analytics
